

Travel vaccine record

(Nurses use only)

For maximum efficacy, all vaccines should be given at least 14 days before departure.

Patients name: DOB

Section 1 This details what you are already covered against as recorded in your NHS notes. We do not have any record of immunisations you may have had at school, work or privately.

<u>Vaccine</u>	<u>Covered (tick if covered)</u>	<u>Last Given</u>
Polio	[]
Revaxis (diphtheria with tetanus and polio)	[]
Typhoid	[]
Hepatitis A (first dose)	[]
Hepatitis A (booster)	[]
Hepatitis B	[]
Meningococcal (A&C)	[]
Yellow fever	[]
Rabies	[]
Other

Section 2 If your trip is felt to be within our area of expertise we will list below the additional cover that you require. If your trip is deemed to be outside of our area of expertise we advise you to call MASTA for their travel health brief.

You need (tick as appropriate)

Polio *	[]	Hepatitis B *	[]
Tetanus and Diphtheria *	[]	Meningitis ACWY	[]
BCG for TB	[]	Rabies *	[]
Typhoid *	[]	Yellow fever *	[]
Hepatitis A *	[]	Japanese Encephalitis	[]
Tick Encephalitis	[]		

Those marked * are offered at the surgery and given by the practice nurses.

Anti-Malaria Tablets [] Type required:.....

[] On private prescription only [] Can be bought from the pharmacy

(If malaria advice alone is all that is required then only one member of the family need make an appointment)

I recommend the above named person to have the vaccines / anti-malaria tablets indicated and/or to contact a dedicated travel clinic / service for specialist advice / vaccines.
